

how to measure your child's foot

whilst we believe our sizing guide is as accurate as possible, fitting feet is not an exact science and there are quite a few factors that can influence sizing. we can certainly exchange if the size is not suitable.

- place your child's bare feet on a sheet of paper (measure both feet as one foot is generally bigger than the other)
- draw a line at the heel and another line above the longest toe
- measure (in mms) between the 2 lines and compare the length of the biggest foot with the size guide below
- choose the closest measurement
- do **not** add on any mm to your child's foot length as we have factored in some extra room for growth

eu size	au size (approx. only .. we suggest to measure foot)	length of foot
25	8	155mm
26	9	161mm
27	10	168mm
28	11	175mm
29	12	181mm
30	13	188mm
31	1	195mm
32	2	201mm
33	3	208mm
34	4	215mm
35	5	221mm
